Project Instructions: **Images** © Stampin' Up! Project © Stamping Imperfection 2012
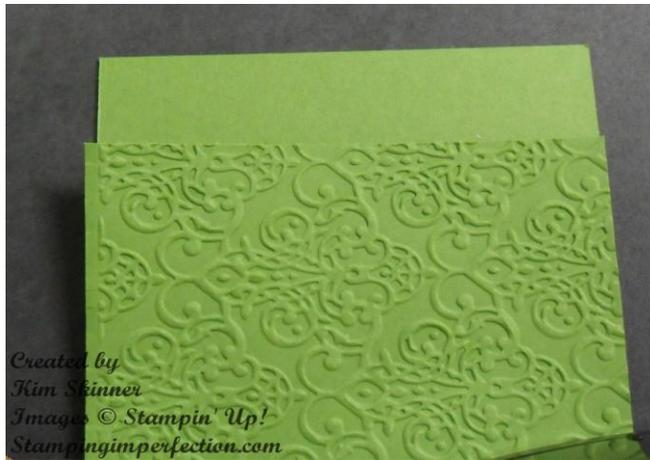

- Cut Gumball Green card stock to 4-1/4 x 11" and score at 5-1/2", cut the Raspberry Ripple card stock 3-1/2 x 5". You will also need to cut a piece of the Be of Good Cheer Designer series paper at 3-1/2 x 3".

- Use your Labels Collection Framelit (#125598) to cut a Label in the DSP to fit on the front of the Gumball Green card front. I believe that I used the 3rd framelit for that.

- Use the Window Frames Framelits (#129021) to cut a tag out of the Raspberry Ripple.

- Stamp your sentiment on Whisper White card stock and cut it out with the extra large oval punch (#119859). Also cut out a scallop circle with the 1-1/4" scallop circle punch (#127811) from the Whisper White.

- I used the Dotted Scallop Ribbon Border punch (#119275) to cut two pieces 4-1/4" for the front of my card.

- I embossed the front of my Gumball Green card with the Lacey Brocade Embossing folder

(#127819) in my Big Shot.

- I then trimmed one inch from the top of my embossed card front.

- **I put this part of the card together by using sticky strip on the inside edges to seal this and make a sleave out of it to slide the gift card holder into. I added the dotted scallop ribbon pieces I punched to the top and bottom edges of the embossed front of the card. I layered the DSP Label, the Window Frame label and then the oval sentiment. (My sentiment was created on My Digital Studio with one of the Christmas brush sets. I love this…I don't need to own every stamp set, I can print a lot of sentiments and images from the MDS software!)**

- **The inner tag was created by attaching the Whisper White scallop circle I punched to the top of the Raspberry Ripple piece of card stock. I punched a ½" hole in the center**

of the scallop using the ½" circle punch (#119869) and tied my Gumball Green

Sweater Trim(#127838) inside the hole. I then cut diagonally at each side of the tag to

give it the tag shape.

- **The DSP I cut was attached with sticky strip to the front of the tag and the gift card**

  slides into this slot.

- **This tag slides into the other one and your gift card holder is complete!**
