Masking To Layer Images

1. Stamp the image you want to appear in front of the others on your project and on masking paper.
2. Cut out the masking paper image and place it over the stamped image on your project.
3. Stamp the image you want to appear behind the first image.
4. Continue in this way until your entire scene is created. Remove masks.

Masking to Color Block a Strip

1. Add two strips of wide low tack masking tape to create the space you want to add color.
2. Ink blend between the masking tape pieces.
3. Remove the masking tape.
4. Stamp your images on your background.

Masking to Stamp a Border

1. Add two strips of wide low tack masking tape to create the space you want the stamped border to go.
2. Stamp your images in the unmasked space.
3. Remove the tape.
4. Add lines with a fine tipped marker to create edges to your border. (Optional)

Masking with a Stencil Shape

1. Use a piece of card stock or heavy weight plastic to create a stencil with a die or punch.
2. Tape the stencil down to your paper and ink blend the paper over the punched area to create the shape you want.
3. Remove the stencil mask and stamp your image.
