

Heat Embossing

1. Lightly rub your embossing buddy powder tool across the paper you want to emboss.
2. Stamp your image using Versa Mark watermark ink.
3. Place your paper in your Powder Pal tray and pour the embossing powder over the stamped image. Gently tap off excess.
4. Heat your powdered image. Keep the tool moving a couple inches above the paper until it is glossy.

Faux Color Heat Embossing

1. Using a stamp positioner, stamp your image in a color and allow to dry.
2. Rub your embossing buddy on the paper.
3. Without moving the stamp or the paper, restamp your image in Versa Mark over the top of the color image.
4. Pour clear embossing powder over your image.
5. Heat set with your heat tool.

Black Magic

1. Use your embossing buddy on black card stock.
2. Stamp your images in Versa Mark ink.
3. Use metallic embossing powder or brightly colored embossing powder on your image.
4. Heat set with your heat tool for a stunning effect.

Emboss Resist

1. Use your embossing buddy on your paper and stamp your image in Versa Mark ink.
2. Use your favorite embossing powder on the image and heat set with your heat tool.
3. Ink blend your inks over your embossed images.
4. Buff the embossed images with a microfiber cloth to remove excess ink.
