

Ideas to Decorate Your Calendars

Instructions ©Stamping Imperfection 2012. All Rights Reserved.

Here are just a few ways you can decorate your calendars that I have used in the last few years!

- Use floral, leaf or flourishes to randomly stamp the background of the entire page. Stamp multiple images with a single inking for a more subdued appearance.

- The whole background of the calendar can be sponged in different colors using your stamp pads or chinks. You can create a stencil with a big shot die and sponge a shape you love on the background as well. (I made a video of this on my Youtube channel.)
- If you stamp over a sponged or stamped background, you will get a really pretty layered look.
- Add photos to your page to personalize it over a stamped background.
- You can also just sponge the edges of each page.
- Use versa mark and chinks or use the versa mark and emboss stamped images.
- Use water colors and blending pens with your Watercolor Wonder Crayons, markers or inks.
- Stamp each page with a different stamped image appropriate for the month. (Snowflakes for January, Hearts for February and so forth.)

- Trim each page and back it with your favorite piece of Designer Series Paper for a more colorful finished look.
- Let your kids help decorate them with stickers. Kids love it and you get them crafting!

The possibilities are endless. Please email me a picture or two of your finished project. I will feature it on my blog at stampingimperfection.com!
