Tips and Suggestions:

Turn this into a 12 x 12" layout by adding 4" to all measurements except the width of the DSP strips. Leave the width of the designer paper the same, but add 4" to the length of each.

You can stamp a background of Maple Leaves by using Always Artichoke in on the Always Artichoke card stock before you begin putting the layout together for more texture and detail.

Turn this into a winter page by using snowflakes (Festive Flurry) to layer in the corner and change the color scheme to white, silver and blue! The Thankful For stamp set would be amazing
