### Marker Technique:

#### Thumping

1. Using the side of the brush tip on your Stampin' Write Markers (or any dye or water based marker), color the portion of the stamp you want to add color to using the lightest color first.
2. Add bits of your darker color by thumping or flicking the darker marker over the lighter one.
3. Once you get all the color added, huff a big breath onto the inked stamp and then stamp it on the paper.
