

Embossing Folders: Basic Embossing

1. Place the card stock inside the embossing folder.
2. Place the folder in your die cutting sandwich according to your machine's directions
3. Run the folder through your machine
4. Trim down your embossed panel and add to card.

Adding Color to Embossing Folder Panels with Daubers

1. Run your card stock through your embossing folder according to your machine's directions.
2. Ink up a dauber and gently touch it to the spot you want to add color to on your embossed panel. Brush it lightly to blend the color.
3. Add different colors where you want them.

Embossing folders: Direct to Paper Ink Swiping

1. Once you have created your embossed background, gently drag an ink pad across the front adding ink to the embossed parts.
2. Do this lightly so you don't get ink in the debossed spaces.

Embossing Folders: Add color To the Inside

1. Swipe your ink pad across the inside front cover of your embossing folder. (The front has the Logo.) Do this gently to get color only on the raised bits.
2. Carefully add the card stock to the inside of the embossing folder.
3. Run the embossing through your machine according to sandwich instructions.
