

### Embossing Folders: Adding Color Inside Technique 2

1. Swipe your ink pad across the inside back cover of your embossing folder. (The front has the Logo.) Do this gently to get color only on the raised bits.
2. Carefully add the card stock to the inside of the embossing folder.
3. Run the embossing through your machine according to sandwich instructions.

### Embossing Folders: Adding Color Inside Technique 3

1. Swipe your ink pad across the inside front cover of your embossing folder. (The front has the Logo.) Do this gently to get color only on the raised bits. Spritz with water.
2. Carefully add the card stock to the inside of the embossing folder.
3. Run the embossing through your machine according to sandwich

### Embossing Folders: Hybrid Embossing Folders

1. Place the die on the inside of the front cover over the coordinating image with the cutting ridge toward the paper.
2. Place the card stock against the cutting ridge of the die and close the folder.
3. Run the folder through your machine with the recommended sandwich.

### Embossing Folders: 3 D Folders

1. Add your card stock to your embossing folder.
2. Spritz with water to avoid the paper cracking.
3. Run the folder through your machine with the recommended sandwich. (3 D folders often require one less cutting plate.)
